DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-9, 12 and 13 are rejected under 35 U.S.C. 102(b) as being anticipated by Hazelton et al. 6,104,108. Hazelton et al. discloses a linear motor with a plurality of magnets having different tilts as described in column 5 lines 41-46 and as shown in figure 2c.

In regard to claims 2, 3 and 7-9 see Hazelton et al. figure 2c.

In regard to claims 4-6, 12 and 13 see Hazelton et al. column 8 lines 28-65.

Allowable Subject Matter

Claims 10 and 11 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter:

The prior art of record does not disclose or teach first and second coils opposing first and second magnet sets in combination with the other features of claim 10. Hazelton et al. discloses a single coil between the two magnet sets. Uchida pre-grant publication 10/079,846 (cited by Applicant) shows a double row of magnets with coils facing each magnet row. However no reason has been found for utilizing a double row of magnets and double row of coils as taught by Uchida in the Hazelton et al. device.
